SELLING DATE - JULY 1975
WARRANTY START DATE - 07/75
CREDITED SELLING DEALER - KEVIN DENNIS MOTORS (NEW) PTY. LTD., RICHMOND

Additional information -

The vehicle bearing the PSN - J487082 - was originally built at GM-H's Dandenong, Melbourne plant as a Sandman utility and completed on 22/07/75. A delay of approximately one week was experienced in the final assembly and Touch Up phases of production. This Sandman was ordered with the more luxurious Kingswood utility as the starting vehicle rather than the base-level Belmont. The 'Sandman' decal package (black for Cotillion White) was sent with the vehicle for fitment at the dealer. No transmission serial number appears on the Vehicle Master Listing print out dated 26/03/77.

VEHICLE PRODUCTION REPORT

Holden Historical Services uses factory-generated particulars to identify and document Holden vehicles. The information we use to generate our exclusive Holden Historical Services Vehicle Production Report (VPR) for any and all Holden car products is sourced from the coding contained in the original Vehicle Master Listing Reporting data printouts. © Holden Historical Services
